HF1826

As a resident in your district, and as a member of the Minnesota Onsite Wastewater Association, I would like to express opposition to HF1826, authored by Bruce Anderson, Carolyn McElfatrick, and Dan Fabian. HF1826 would repeal current rules and regulations regarding subsurface sewage treatment systems (SSTS) and reinstate the rules and regulations regarding SSTS as they existed on December 31, 2007.

The Association supports moving forward with a consistent state code for its protection of the public's health, the state's water resources, and the environment. The Association is interested in working with all the parties around this issue to reach that goal.

Sincerely,
