

Small Community Wastewater Options Workshop: Introductory Session

Providing communities with the tools to research and adopt a viable solution for their wastewater treatment.

Community leaders, township officials, and county staff, as well as tribal, lake association, and small community members should plan to attend. This valuable workshop provides the opportunity to learn what steps need to be taken to address the wastewater issues that many communities face.

Staff from the University of Minnesota Extension, TetraTech Environmental, Minnesota Pollution Control Agency, and funding agencies will teach at the workshop. Additionally, members of communities that have successfully addressed their wastewater needs will share their experiences and insight with attendees.

INTRODUCTORY SESSION DATES & LOCATIONS:

October 15, 2009

Chase on the Lake
502 Cleveland Blvd
Walker, MN

Ph: (888) 242-7306 or (218) 547-7777

Small Community Wastewater Options Workshop Series SESSIONS 2-6

Following the introductory session, you will have the option of continuing with five additional 3-hour sessions over a five month period. **There are no fees associated with the Small Community Wastewater Options Workshop Series.**

This series will provide an opportunity for communities to explore topics in more depth as well as:

- Develop and implement a communication plan
- Complete and submit the Project Priority List Application
- Complete and submit applications to appropriate agencies for planning funds.

Topics to be covered:

Session 2: Review of wastewater treatment options, responsible management entities, and the community decision-making process.

Session 3: Using the site evaluation/CAR process to understand your situation, funding the planning stages, and the MPCA Project Priority List.

Session 4: Data interpretation, wastewater treatment system operation and management

Session 5: Working with professionals and funding a wastewater treatment project

Session 6: Bus tour of a variety of community systems, including "standard" and "advanced" ISTS, cluster soil-based, and municipal style.

INTRODUCTORY SESSION **REGISTRATION**

The \$15 **per person** course fee covers the cost of workshop materials, refreshment breaks and lunch.
